

IMPORTANT NOTES: Read First

(A) Use liquid thread lock (such as Loctite®) with all threaded hardware. **Important:** Liquid thread lock (prior to curing) helps to eliminate the common problem of "thread seizure" in stainless steel hardware by serving as a lubricant during assembly.

(B) When installing the Shade Sail Canopy, make sure that the lowest point of the roof is a minimum of 84" [2130mm] above the underlying play surface.

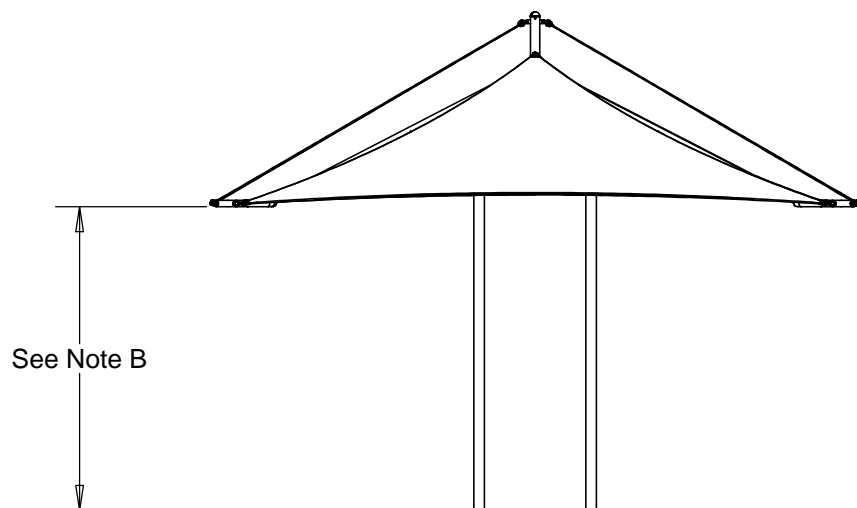

(C) Remove sails from Shade Sail Canopy in high wind and heavy snow conditions. Block protrusions while sails are removed to maintain CPSC/ASTM compliance.
