

IMPORTANT NOTES: Read First

- (A) Use liquid thread lock (such as Loctite®) with all threaded hardware. **Important:** Liquid thread lock (prior to curing) helps to eliminate the common problem of "thread seizure" in stainless steel hardware by serving as a lubricant during assembly.
- (B) Do not pour concrete until the equipment is completely assembled, leveled and plumbed. Concrete must be allowed to cure completely before using the equipment (at least 72 hours).
- (C) Refer to Installation Manual for 1309 Half Wall installation instructions.
- (D) An appropriate energy absorbing safety surface is required under and around all playground equipment. Loose fill protective surfacing is shown only as an example for the purpose of this assembly instruction. Other surfacing material may vary in thickness and/or compression depths. See free publication - The Handbook for Public Playground Safety, Publication #325 at www.cpsc.gov for the surfacing appropriate for the fall height of the equipment or consult your surfacing supply representative.

**FIGURE 1
Slither Climber**

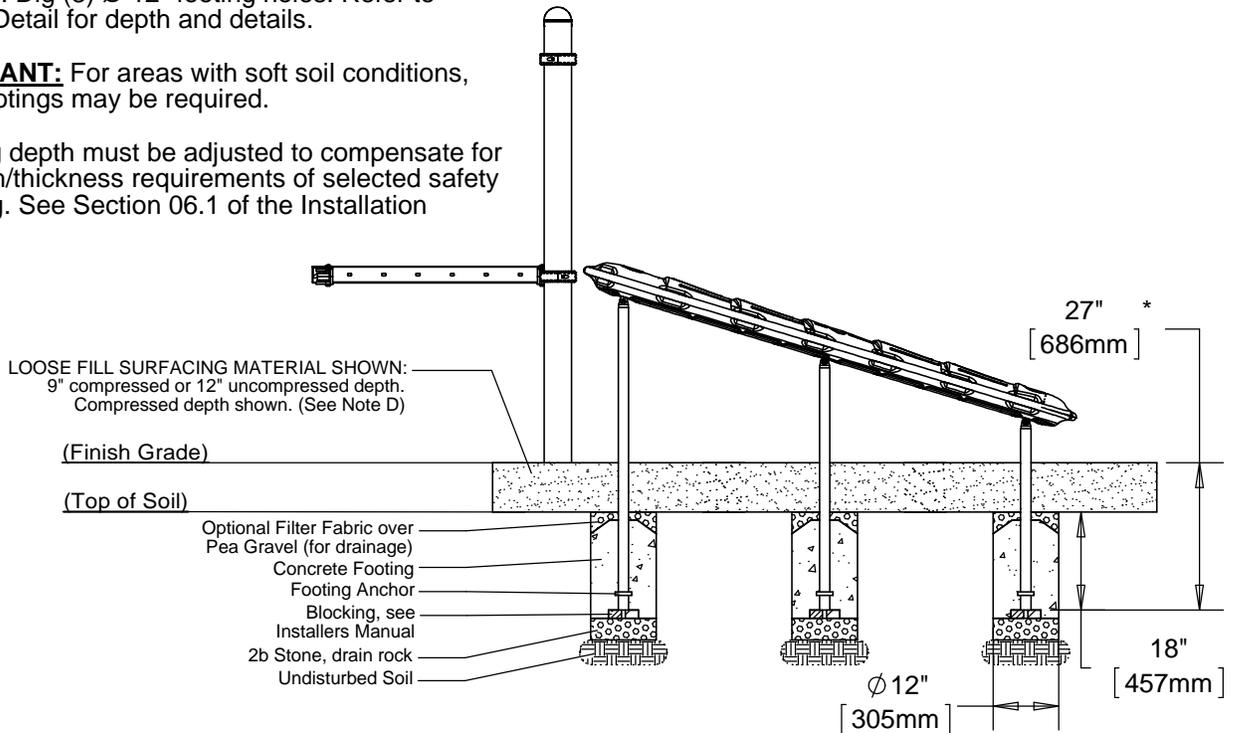

Step 1

Refer to Footing Layout and mark footing hole locations. Dig (3) $\text{\O} 12''$ footing holes. Refer to Footing Detail for depth and details.

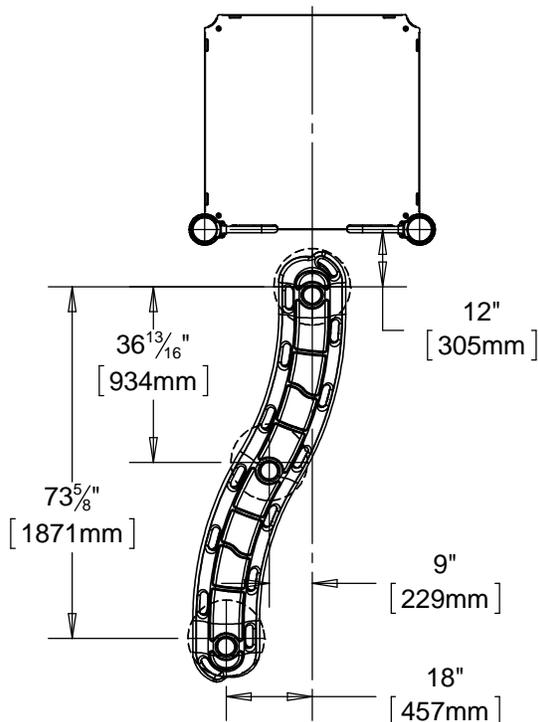

IMPORTANT: For areas with soft soil conditions, larger footings may be required.

* Footing depth must be adjusted to compensate for the depth/thickness requirements of selected safety surfacing. See Section 06.1 of the Installation Manual.

Top View - Ridge Up Installation Footing Layout

Step 2

Attach Slither Climber Support Mount Brackets and Plugs to Slither Climber as shown in Figure 1.1. (See Note A)

NOTE: Ensure Support Mount Brackets are attached to Slither Climber for desired Ridge installation.

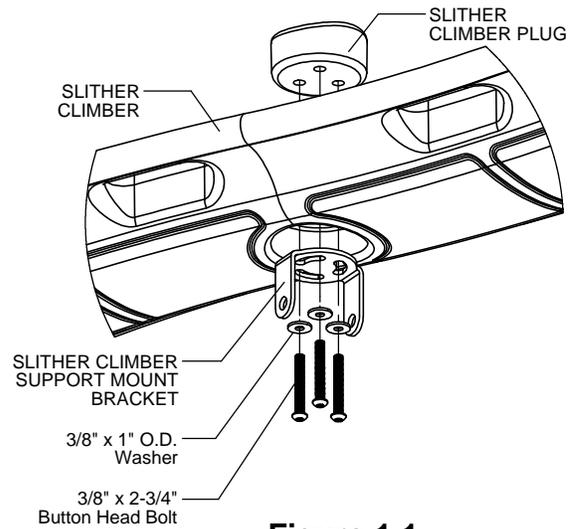

Figure 1.1

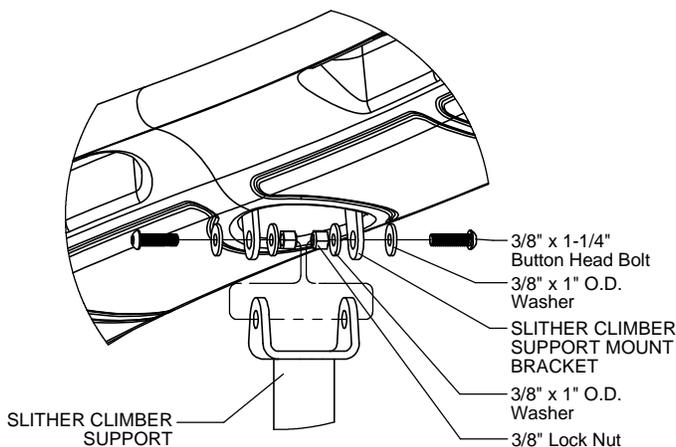

Figure 1.2

Step 3

Attach Slither Climber Support Mount Brackets to Slither Climber Supports as shown in Figure 1.2. (See Note A)

Step 4

Attach Half Walls. (See Note C)

Step 5

Fully tighten all fasteners according to the "TIGHTENING TORQUE FOR HARDWARE" section of the Installation Manual.

Step 6

Place Slither Climber into footing holes. Plumb and level entire component. Pour concrete into footing holes. Allow at least 72 hours to cure before using this equipment. (See Note B)

Step 7

Place required protective surfacing under and around Slither Climber. (See Note D)

Parts List

Part #	DESCRIPTION	QTY.
BE-0241	Slither Climber Support Mount Bracket	3
DE-0009	Slither Climber	1
DE-0025	Slither Climber Roto Plug	3
FS-1919-DSPT	Slither Climber To Deck Top Support	1
FS-1919-DSPL	Slither Climber To Deck Lower Support	1
FS-1919-DSPM	Slither Climber To Deck Middle Support	1
9103062-TR	Bolt Button Head 3/8" x 1-1/4"	6
9103122-TR	Bolt Button Head 3/8" x 2-3/4"	9
9333002	Washer Flat 3/8" x 1" O.D. x .100" thick	21
9413002	Nut Lock 3/8"	6

Specifications

SLITHER CLIMBER:

Shall be constructed of UV-stabilized, rotationally molded, linear, low density polyethylene with an average wall thickness of .250".

SLITHER CLIMBER SUPPORTS:

Shall be fabricated using 1.900" O.D. 11 gauge steel tubing with welded 1/4" thick steel mounting bracket. The Slither Climber Supports shall have a multi-stage baked-on powder coat finish.

SLITHER ROTO PLUG:

Shall be constructed of UV-stabilized, rotationally molded, linear, low density polyethylene with an average wall thickness of .250".

SLITHER CLIMBER SUPPORT MOUNT BRACKET:

Shall be punched and formed from 3/16" thick sheet steel. The Slither Climber Support Mount Bracket shall have a multi-stage baked-on powder coat finish.

HARDWARE:

Shall be stainless steel, zinc/nickel plated or galvanized as required to resist rust and corrosion.

Maintenance

Periodically tighten all screws, bolts and nuts. A periodic inspection of all parts is necessary. If a part is broken or worn, replace immediately. For general maintenance please refer to our Playground Maintenance Manual.
