

## IMPORTANT NOTES: Read First

(A) Use liquid thread lock (such as Loctite®) with all threaded hardware. **Important:** Liquid thread lock (prior to curing) helps to eliminate the common problem of "thread seizure" in stainless steel hardware by serving as a lubricant during assembly.

(B) Refer to Installation Manual for 09 Collars assembly instructions.

(C) Use appropriate compliant protective surfacing and adjust footing depths accordingly. See free publication - The Handbook for Public Playground Safety, Publication #325 at [www.CPSC.gov](http://www.CPSC.gov) for the surfacing appropriate for the fall height of the equipment or consult your surfacing supply representative.

**NOTE:** R5 Access Climber shown.  
R3.5 configuration will vary slightly,  
but does not affect assembly.

## Step 1

Locate and attach collars at heights shown in Front Elevation (See Note B).

\* Height shown from top of collar to top of collar.

\*\* Height shown from finish grade to top of collar.
