

IMPORTANT NOTES: Read First

- (A) Use liquid thread lock (such as Loctite®) with all threaded hardware. **Important:** Liquid thread lock (prior to curing) helps to eliminate the common problem of "thread seizure" in stainless steel hardware by serving as a lubricant during assembly.
- (B) Do not pour concrete until the equipment is completely assembled, leveled and plumbed. Concrete must be allowed to cure completely before using the equipment (at least 72 hours).
- (C) Refer to Installation Manual for R5-1304 Slide Sit Down Wall or R3.5-1304 Sit Down Wall assembly instructions.
- (D) Use appropriate compliant protective surfacing and adjust footing depths accordingly. See free publication - The Handbook for Public Playground Safety, Publication #325 at www.CPSC.gov for the surfacing appropriate for the fall height of the equipment or consult your surfacing supply representative.
- (E) Slide exit height shall be no greater than 11". Exit region must also have a downward slope of 0 to 4°.

FIGURE 1
36" Single Slide

NOTE: R5 Configuration shown.
R3.5 will vary slightly, but does
not affect the assembly.

Step 1

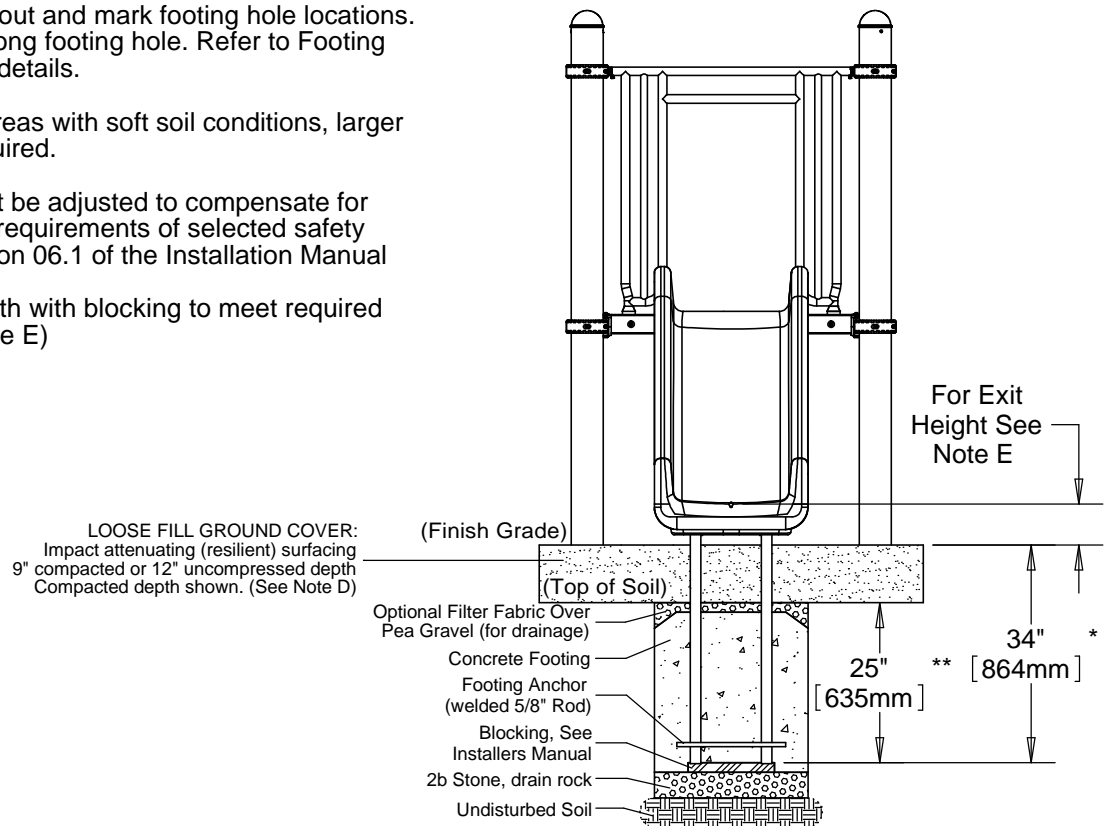

Refer to Footing Layout and mark footing hole locations. Dig (1) 12" x 24" oblong footing hole. Refer to Footing Detail for depth and details.

IMPORTANT: For areas with soft soil conditions, larger footings may be required.

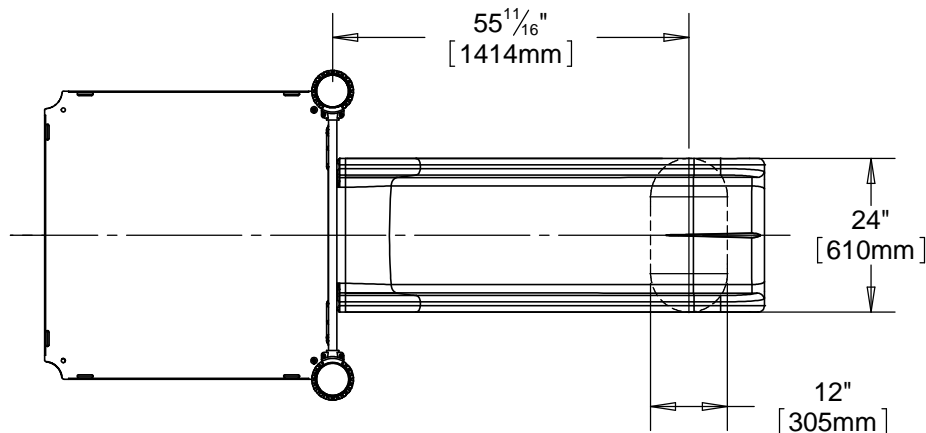

* Footing depth must be adjusted to compensate for the depth/thickness requirements of selected safety surfacing. See Section 06.1 of the Installation Manual

** Adjust footing depth with blocking to meet required exit height. (See Note E)

Footing Detail

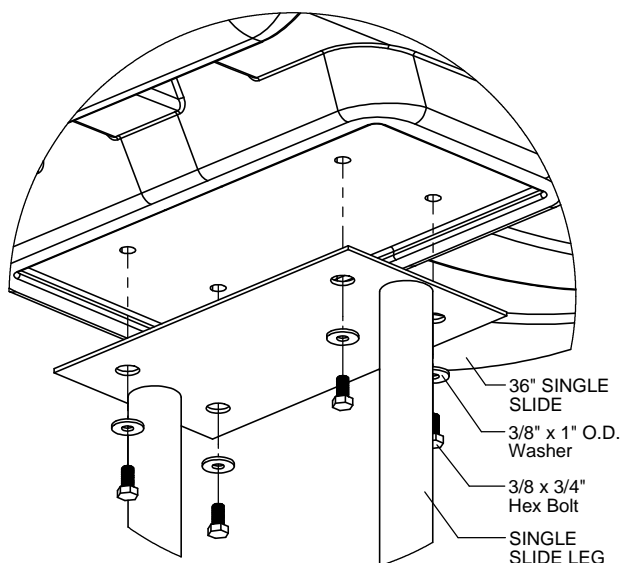

Figure 1.1

Step 2

Attach the Slide Sit Down Wall to the deck and posts. (See Note C)

Step 3

Attach the Single Slide Leg to the 36" Single Slide as shown in Figure 1.1. (See Note A)

Step 4

Place the 36" Single Slide in the footing hole and attach to the deck as shown in Figure 1.2. (See Note A)

Step 5

Fully tighten all fasteners according to the "TIGHTENING TORQUE FOR HARDWARE" section of the Installation Manual.

Step 6

Plumb and level entire component. Pour concrete into footing hole. Allow at least 72 hours to cure before using this equipment. (See Note B and E)

Step 7

Place appropriate compliant protective surfacing under and around 36" Single Slide. (See Note D)

36" SINGLE SLIDE

1701-3
Page 4 of 4

Specifications

36" SINGLE SLIDE:

Shall be constructed of UV-stabilized, rotationally molded, linear, low density polyethylene with an average wall thickness of .250".

SINGLE SLIDE LEG:

Shall be fabricated of 1.660" O.D. 11 gauge steel tubing welded onto a 10 gauge steel plate. The Single Slide Leg has a multi-stage baked-on powder coat finish.

HARDWARE:

Shall be stainless steel, zinc/nickel plated or galvanized as required to resist rust and corrosion.

Parts List

Part #	DESCRIPTION	QTY.
DE-4399	36" Single Slide	1
FS-1701	Single Slide Leg	1
9103082-TR	Bolt Button Head 3/8" x 1-3/4"	4
9123032	Bolt Hex 3/8" x 3/4"	4
9333002	Washer Flat 3/8" x 1" O.D. x .100" thick	12
9413002	Nut Lock 3/8"	4

Maintenance

Periodically tighten all screws, bolts and nuts. A periodic inspection of all parts is necessary. If a part is broken or worn, replace immediately. For general maintenance please refer to our Playground Maintenance Manual.
