

IMPORTANT NOTES: Read First

(A) Use liquid thread lock (such as Loctite®) with all threaded hardware. **Important:** Liquid thread lock (prior to curing) helps to eliminate the common problem of "thread seizure" in stainless steel hardware by serving as a lubricant during assembly.

(B) Refer to Installation Manual for 09 Collars installation instructions.

(C) An appropriate energy absorbing safety surface is required under and around all playground equipment. Loose fill protective surfacing is shown only as an example for the purpose of this assembly instruction. Other surfacing material may vary in thickness and/or compression depths. See free publication - The Handbook for Public Playground Safety, Publication #325 at www.cpsc.gov for the surfacing appropriate for the fall height of the equipment or consult your surfacing supply representative.

Step 6

Insert Extension Wall tabs into Tri-Deck Extension and attach to collars as shown in Figure 1.2. (See Note A)

Step 7

Attach Extension Wall to Tri-Deck Extension and Double Slide Spacer as shown in Figure 1.3. (See Note A)

Step 8

Fully tighten all fasteners according to the "TIGHTENING TORQUE FOR HARDWARE" section of the Installation Manual.

Step 9

Place required protective surfacing under and around Double Slide Deck Extension. (See Note C)

Specifications

DOUBLE SIT DOWN EXTENSION WALL:

Shall be fabricated using 1.315 O.D. 12 gauge steel tubing with welded 1.029 O.D. 14 gauge steel guard rails, slide insert, and 1/4" thick steel clevises. The Double Sit Down Extension Wall shall have a multi-stage baked-on powder coat finish.

TRI-DECK EXTENSION:

Shall be fabricated using punched, formed and welded 12 gauge sheet steel. The Tri-Deck Extension shall be Play-Tuff™ coated after fabrication.

DOUBLE SLIDE SPACER:

Shall be made from high density 3/4" sheet plastic specially formulated for optimum UV stability and color retention.

MOUNTING BLOCKS:

Shall be two-part and precision die-cast from a high strength aluminum alloy. The Mounting Blocks have a multi-stage baked-on powder coat finish.

HARDWARE:

Shall be stainless steel, zinc/nickel plated or galvanized as required to resist rust and corrosion.

Maintenance

Periodically tighten all screws, bolts and nuts. A periodic inspection of all parts is necessary. If a part is broken or worn, replace immediately. For general maintenance please refer to our Playground Maintenance Manual.
