

## **IMPORTANT NOTES: Read First**

(A) Use liquid thread lock (such as Loctite®) with all threaded hardware. **Important:** Liquid thread lock (prior to curing) helps to eliminate the common problem of "thread seizure" in stainless steel hardware by serving as a lubricant during assembly.

(B) An appropriate energy absorbing safety surface is required under and around all playground equipment. Loose fill protective surfacing is shown only as an example for the purpose of this assembly instruction. Other surfacing material may vary in thickness and/or compression depths. See free publication - The Handbook for Public Playground Safety, Publication #325 at [www.cpsc.gov](http://www.cpsc.gov) for the surfacing appropriate for the fall height of the equipment or consult your surfacing supply representative.

### Step 1

Refer to Elevation View, locate mounting holes and remove required Hole Plugs for assembly. Heights shown from finish grade to mounting hole.

Elevation View

Figure 1.1

### Step 2 (Factory Assembled)

Attach Chain Net to Curved Chain Net Wall Frame as shown in Figure 1.1. (See Note A)

### Step 3

Refer to Elevation View and attach Curved Chain Net Wall Frame to posts as shown in Figure 1.2. (See Note A)

### Step 4

Fully tighten all fasteners according to the "TIGHTENING TORQUE FOR HARDWARE" section of the Installation Manual.

### Step 5

Place required protective surfacing under and around Curved Chain Net Wall RV. (See Note B)
