

IMPORTANT NOTES: Read First

(A) Use liquid thread lock (such as Loctite®) with all threaded hardware. **Important:** Liquid thread lock (prior to curing) helps to eliminate the common problem of "thread seizure" in stainless steel hardware by serving as a lubricant during assembly.

(B) Do not pour concrete until the equipment is completely assembled, leveled and plumbed. Concrete must be allowed to cure completely before using the equipment (at least 72 hours).

(C) Refer to Installation Manual for NF-5102 NFuse 2-Rung Access Ladder installation instructions.

(D) The maximum height of rungs (at grasping point) from the top of the protective surfacing for ages 5-12 is 84" [2130mm] above protective surfacing.

(E) An appropriate energy absorbing safety surface is required under and around all playground equipment. Loose fill protective surfacing is shown only as an example for the purpose of this assembly instruction. Other surfacing material may vary in thickness and/or compression depths. See free publication - The Handbook for Public Playground Safety, Publication #325 at www.cpsc.gov for the surfacing appropriate for the fall height of the equipment or consult your surfacing supply representative.

Step 5

For Deck Mount Version Only

Attach Net Link Deck Connector to Deck as shown in Figure 2. (See Note A)

Step 6

For Deck Mount Version Only

Attach Deck Link Nets to Net Link Deck Connector as shown in Figure 3. (See Note A)

Step 7

Fully tighten all fasteners according to the "TIGHTENING TORQUE FOR HARDWARE" section of the Installation Manual.

Step 8

Place required protective surfacing under and around NFuse Ring Traverse. (See Note E)

Specifications

NFUSE RING TRAVERSE - WELDMENT:

Shall be fabricated using 1.660" O.D. 11 gauge steel tubing with welded 1/4" plates and 3/16" thick steel hangers and will have a multi-stage baked-on powder coat finish.

NFUSE RING TRAVERSE - TOP INSIDE WELDMENT:

Shall be fabricated using 2.375" O.D. 10 gauge steel tubing with welded 1/4" plates and 3/16" thick steel clevises (for deck mount version) and will have a multi-stage baked-on powder coat finish.

NFUSE RING TRAVERSE - RUBBER PAD:

Shall be constructed of UV-stabilized flexible rubber compound with slash proof, reinforced metal inserts.

ANGLED NET LINK DECK CONNECTOR:

Shall be fabricated using 1/4" thick steel with welded 3/16" thick steel clevises and will have a multi-stage baked-on powder coat finish.

NFUSE DECK LINK NET:

Shall be made from 16mm steel-reinforced rope with high-strength copolymer plastic intersection connectors and machined aluminum ferrules.

HARDWARE:

Shall be stainless steel, zinc/nickel plated or galvanized as required to resist rust and corrosion.

Maintenance

Periodically tighten all screws, bolts and nuts. A periodic inspection of all parts is necessary. If a part is broken or worn, replace immediately. For general maintenance please refer to our Playground Maintenance Manual.
